Projects

Nebulaa Innovations Pvt Ltd.

Frontend Developer

Jan 2024 – Present Hyderabad

- Developed real-time dashboards with React, Redux, Context API, Socket.IO, and JWT.
- Built support ticket handling pages using HTML, CSS, JavaScript, Flask, and PostgreSQL.
- Developed secure and efficient APIs in Flask, leveraging JWT authentication and multithreading for optimized data storage.
- Designed PostgreSQL schemas and wrote dynamic SQL queries for data management.
- Worked extensively with Git, GitHub, and Linux commands for development and deployment.
- Gained hands-on experience in OOPs concepts, and libraries like Bootstrap and Material-UI.

Self Project.

Travel World

June 2023 – Sep 2023 Vadlamudi

- Developed a travel tour application that allows users to book tickets for tours and vacations.
- Created a responsive and user-friendly interface with Bootstrap and CSS.
- Implemented a secure authentication system using JWT token for user registration and log-in.
- Developed a RESTful API to manage server-side functionality, including Create, Read, Update, and Delete (CRUD) operations for user requests.
- Tech-Stack:- MERN, CSS, Bootstrap

Self Project

News App

Jan 2022 – Mar 2022 Vadlamudi

- Developed a fully responsive news website that allows users to access the latest news updates.
- Integrated an external API to fetch and display real-time news data on the website efficiently.
- Implemented an infinite scroll feature in React, allowing for smooth navigation through a large collection of news articles.
- Tech-Stack:- React, NewsAPI, CSS, Bootstrap.

Education

B.Tech:Textile Technology

Vignan's University, Vadlamudi

CGPA : 8.0 2022

Technical Board Of Education

GITT , Guntur

Percentage : 78.8 2019

Secondary School Certificate

ZPHS Nandivelugu

CGPA : 7.8 2015

Tools and Language skills

- Programming Languages : Java Script, Python
- Frameworks: React (with Redux, Context API, and Hooks), Express, Bootstrap.
- Database: PostgreSQL
